

Australian made enclosures manufactured to suit Australian Rail Operators and the toughest weather conditions.

Rail Signalling Enclosure Solutions

Project:

Aluminium enclosure under development for use in Western Australia

Clients:

Rio Tinto / FMG

Location:

Pilbara region, Western Australia

A Family Drive For Excellence Fuels Success

B&R Enclosures was founded by Dick Bridges in 1955, specialising in sheet fabrication including electrical enclosures for domestic metering applications. B&R's growth has seen the establishment of manufacturing plants in Brisbane, Adelaide and Sydney, 10 locations nationally and an international network of distributors allowing them to increase the range, availability, quality and service to their customers.

Now under the direction of the founders son, Ken Bridges, B&R has grown to be the largest manufacturer of domestic, commercial and industrial enclosures in Australia with the company remaining Australian family owned and operated.

Today B&R Enclosures manufacture and supply a variety of products to several different industries and applications offering electrical enclosures for residential and commercial buildings, new infrastructure developments, industrial controls, mine processing, oil and gas and data centres.

B&R Enclosures continue to remain heavily involved with the infrastructure enclosure market specifically designing products to suit road authorities nationally. This range of enclosures paved the way for B&R to expand its infrastructure solution to offer the rail market products to suit the needs of rail operators.

With a detailed understanding of rail project requirements, standards and specifications for metropolitan and regional rail authorities, B&R have a range of enclosures suitable for rail projects in isolated and often challenging environments.

B&R Enclosures are proud to support:

Quality and product accreditations:

Project:

Single & double width enclosure for use in Queensland

Client:

QR National

Location:

Central Queensland

Project:

Sunbury Electrification

Client:

MTM

Location:

Sunbury, Victoria

Project:

Maryborough Line Crossing

Client:

V/Line Passengers

Location:

Regional Victoria

Project:

Dry Creek Rail Depot

Client:

Trans Adelaide

Location:

Adelaide, SA

Capabilities

Manufacturing Facilities

- Brisbane, Adelaide and Sydney
- ISO9001:2008

Design & Engineering

- Project assistance
- Customising standard products
- Designing new products

National Distribution Network

- Sales offices / warehouse in all state capitals
- Available stock
- Short delivery times

Experienced Field Consultants

- Representatives in all major centres.
- Specialists in electrical industry, switchboards, hazardous areas, telecommunications, datacentres and infrastructure

Superior Products

Mine Infrastructure

- Control & Marshalling
- Material Handling & Processing
- Outdoor or Arduous Environments

Hazardous Area Equipment

- Dust & Fibre Filled Environments
- Gas & Vapour Filled Environments

Infrastructure

- Road
- Rail
- Ports

Switchboards & MCCs

- Motor Control
- Process Control
- Power Distribution

Data Racks & Cabinets

- Data Centres
- Small Business
- Wall-mounted Applications
- Outdoor or Arduous Environments

Climate Control Equipment

- Fans and Filters
- Heat Exchangers
- Air Conditioners

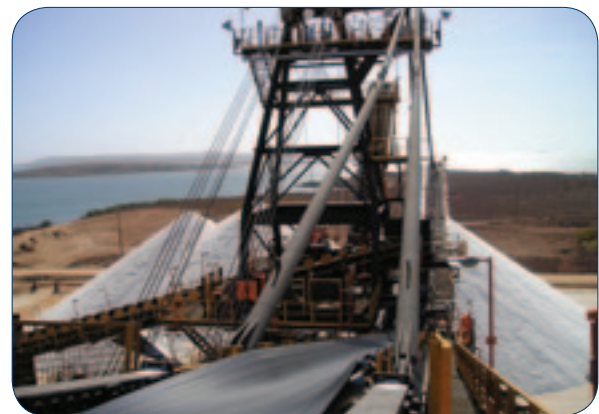

Major Projects

Recognising the global resource demand, B&R Enclosures have recently established a new division focusing on providing custom built solutions for major project requirements.

B&R Enclosures offer solutions for the mining industry including:

- High Corrosive Area Environment Marshalling Panels
- Field Remote L/O Panels
- Port Conveyor Ore Handling Panels
- Other Customised Low Voltage Solutions

Understanding the needs of consultants and contractors, B&R's Major Projects Division can provide a total solution to deliver a product that satisfies the objective and requirements of the project. Our design and engineering teams are available to discuss requirements from conceptual study to project execution.
