

PROJECT PROFILE

SHARK BAY RESOURCES

Swispec, Bunbury WA

THE PROJECT

The project was the installation of a telemetry system for remote control of the sea water intake pumps at Shark Bay Resources in Shark Bay WA.

THE PROBLEM

Swispec's only requirement was that the enclosures needed to withstand the conditions of being installed on the mid north coast of WA.

THE B&R SOLUTION

B&R's solution was to supply a NI stainless steel.

THE RESULT

The customer has been a solid supporter of B&R for many years and always uses our product. The customer likes the fact that they are stocked locally.
