

## PROJECT PROFILE

### CHRISTMAS COMES BUT ONCE A YEAR

#### THE PROJECT

Twas the night before Christmas, and outside the house,  
There was a power problem, needing enclosures with mouse.  
So off to B&R the decorator did go,  
Needing a quick fix to a problem, not a "Yo, ho, ho, ho!"

#### THE PROBLEM

The problem was dire, in a watery way,  
but also of heat, as St Nicholas might say.  
An enclosure was sought, instead of a stocking,  
the result of the later could have been quite shocking!

#### THE B&R SOLUTION

The B&R solution was the Universal NI,  
which the decorator did accept with a relieved sigh.  
The water was kept out, but with fans and a vent  
up the chimney was where any heat build up went.

#### THE RESULT

The moral of this story is you should pick B&R.  
For Australian enclosures you don't have to go far!  
To all Australians filling their houses with light,  
Happy Christmas to you all, and to all a good night.
