# About B&R Enclosures

Since 1955, B&R has built a reputation for excellence in the design and manufacture of enclosures. Everything we have learned in that time, we've poured into our products and relationships.

B&R Enclosures was founded by Dick Bridges in 1955, specialising in sheet metal fabrication, including electrical enclosures for domestic metering applications.

With little capital but great enthusiasm for operating his own business and a determination to succeed, Dick commenced operations in his backyard in Adelaide, South Australia.

This family determination has seen B&R grow from a backyard operation to a multinational company with manufacturing plants in Brisbane, Adelaide, Sydney and Suzhou, China, 8 offices nationally and a network of international distributors.

As a 100% Australian, family-owned business, B&R champions the virtues of quality, service and value. Combined with our unrivalled industry and application knowledge, we are in a unique position to meet the needs of our customers.

B&R Enclosures encompasses four divisions: Industrial, Data ICT, Hazardous Areas and Residential Commercial. Each division focuses on the unique needs of different market segments.

Together, these divisions share the strengths, resources and experience of the founding company to provide attentive customer service, innovative design and superior quality products.

Some of the largest companies around the world use B&R as a major supplier. These include BHP Billiton, Rio Tinto and the Australian government to name a few. We have enjoyed repeat business with the world's leading mining companies for over 20 years.

B&R Enclosures can offer extensive supply chain capabilities featuring supply from stock (ex our national warehouse network), supply of assembled to order solutions with short lead times, value adding services and cooperation with other suppliers to allow for integration of third-party products into enclosures, racks or cabinets prior to shipment.

B&R is also experienced in arranging specialised freight, product delivery, installation and removal of packaging. We measure our service performance and can provide regular written reports if required. B&R also provides key account management and project management to ensure that we clearly understand and can anticipate the ongoing needs of our customers.

# HAE product solutions

At B&R, our industry experience and manufacturing expertise allows us to deliver to our customers a range of Hazardous Areas Electrical Equipment that ensures peace of mind.

For over 10 years, B&R Enclosures have been supplying and manufacturing quality electrical equipment suitable for hazardous areas installations.

B&R's electrical solutions are suitable for applications including:

- Mines
- Oil rigs
- Petrol refineries
- Chemical
- Grain handling
- Wheat silos
- Power stations
- Spray painting; and more

B&R offer a large range of certified electrical enclosures, lighting, controls and cable glands as well as IECEx certified value add services including custom control fit outs.

All products are IECEx certified and include:

- LED, fluroescent, floodlighting, well glass, linear, caution and exit lighting.
- Terminal & control enclosures – sloping roof, flat roof, pushbutton and Ex D.
- Plugs & Socket Outlets
- Cable Glands

With an established IECEx certified facility in Riverwood, New South Wales, utilise value add services to provide customers with a 100% fit-for-purpose solution for hazardous area locations.

B&R's philosophy of quality is applied from design through to delivery, so you can be certain your hazardous area projects are safe and reliable.

B&R recently established two value add facilities in Southeast Asia and Saudi Arabia, utilising the expertise and of the founding company, B&R SEA and B&R Gulf to provide the highest quality value add products to suit the requirements of customers for highly specified projects within this expanding market.

B&R's hazardous areas electrical equipment is used in Australia and internationally in Asia and the Middle East regularly on major projects.

B&R's HAE products are on approved vendor lists of many Oil & Gas companies and end users in Asia and the Middle East.
