### **About B&R Enclosures**

Since 1955, B&R Enclosures has built a reputation for excellence in design and production, culminating in our position as one of Australia's largest enclosure manufacturers and electrical equipment integration specialists.

As an independent, 100% Australian family owned and operated business, we champion the virtues of quality, innovation, service and value. The emphasis on these aspects has sustained B&R's growth leading to Australian manufacturing and distribution facilities in Brisbane, Adelaide and Sydney and internationally in China and Saudi Arabia.

B&R's knowledge, precision, quality and unwavering commitment to creating repeatable solutions for our clients supports our position as preferred manufacturer for many private, government and commercial projects in some of Australia's harshest environments.

The business encompasses four divisions: Industrial, Data ICT, Hazardous Areas and Residential Commercial. Each division focuses on the unique needs of different market segments.

B&R regularly works with partners to provide integrated solutions for major infrastructure and mining projects. These include 'plug and play' switchboard solutions for Rio Tinto's Oyu Tolgoi mine, control stations for Ichthys on-shore LNG processing plant and Australia's NBN Rollout. Ongoing relationships and collaboration are results of our ability to articulate the customer's problem and combine previous experience and knowledge with compliance to local standards.

Electrical integration involves the installation, commissioning and testing of 3rd party components and we are adept at managing the acquisition and storage of technical components through a global supply chain that is structured, customised, agile, repeatable and results-based. Project management and execution is effectively managed at B&R by the co-location of design, supervision, supply coordination and quality control along with manufacturing. Our incorporation of Industry 4.0 delivers real-time data to our project management teams, built around the requirements of individual projects.

Extensive investment in research and development includes an environmental testing facility focussing on climate control to support cooling solutions for equipment exposed to high ambient temperatures and solar radiation.

When utilised as designed, B&R's enclosures are built to out-perform against expectations.

Contact us today to find out how B&R can deliver reliable and trusted outcomes for your project.

### **Our Locations**

B&R Enclosures have purpose-built manufacturing facilities in three locations across Australia, as well as strategic locations in the Gulf and China.

#### Australia

### Brisbane (QLD)

Global head office, manufacturing, sales and warehousing

#### Sydney, NSW

Hazardous manufacturing, sales and warehousing

#### Adelaide, SA

Manufacturing, sales and warehousing

Townsville (QLD), Newcastle (NSW), Melbourne (VIC), Darwin (NT), Perth (WA) Sales and warehousing

#### **New Zealand**

#### Auckland

Sales and warehousing

#### Saudi Arabia

#### Dammam

Hazardous manufacturing, sales and warehousing

#### China

#### Suzhou

## **Our Capabilities**

Over the years as the company has grown, we have invested significantly in machinery, technology and testing to be able to provide capabilities which our customers benefit from in every order they place. Our current capabilities include:

- Purpose-built Australian facilities in Brisbane (18,000m²), Adelaide (4,000m²) and Sydney (1,874²), providing local labour and logistics
- · Complete in-house design and engineering services to assist with creating custom solutions
- End-to-end manufacturing, from coiled steel raw material to commissioning the end product, we provide efficiency and complete
  quality control
- Variety of substrates and high quality finishes including stainless steel, powder coated and zinc to suit even the most demanding applications
- Modern machinery for any design to be formed and fabricated including automated sheet metal panel benders, punching and shearing centres, electrical equipment integration lines, press brakes, powder coat lines, fabrication cells and assembly lines
- Fully documented process available with full configuration management to support a detailed documentation experience
- · Complete project management including supply chain, warehousing and logistics
- In-house and external testing for hazardous area electrical equipment and impact, IP, type testing, static load, seismic, wind load, salt spray, line inspection, shock, vibration, 2000A high current switchboard temperature rise type testing, EMC and MIL-STD
- · Continuous improvement with our environmental testing facility for ongoing research and development
- Existing supply agreements with leading OEMs and major raw products distributors supporting loyal and valued relationships climate control and cooling solutions

# **Our Supply Strategies**

Made to Stock

These products are available ex stock from all our sales & warehousing branches. Contact your local sales representative to discuss requirements.

Assembled-to-Order

These products are assembled to order upon receipt of a customer order. All components required to build an ATO item cannot be sold separately and must form part of a kit. Standard lead time is 4-6 weeks from date of order.

Made to Order

These products are manufactured according to a customer's specification. They are marked in our catalogues as "A Available on request" and have a standard lead time of 2-3 weeks.

Engineered-to-Order

These products are a custom designed product that is 100% fit-for-purpose, delivered onsite and ready for installation. Our design & engineering team can customise an enclosure to suit the application requirements. Contact us for more information.

# **Customisable Project Services**

#### Collaboration

- · Convert customer requirements to product build specifications
- · Work to customer delivery schedule
- · Initiate procurement or consignment of stock allocations
- · Supply of equipment configuration

#### **Complete Project Management**

- · One point of contact
- · Responsive communication channels
- DIFOTIS Delivered In Full On Time In Specification
- Accountability for the delivery of our commitment to customers

#### **Electrical & Equipment Integration**

- Wiring and equipment installed to exact requirements
- Management of free issue, consigned and/or B&R sourced components and equipment
- · Stock reporting and job allocation

#### **Testing & Reporting To Customer Specifications**

- Digital reports of product testing and acceptance
- Serialised codes to customer requirements, digital signature, component traceability and unique identifiers
- Real time quality assurance authorisation, approval and confirmation

#### **Customer Specific Logistics**

- · Storage and warehouse management
- · Site delivery logistics
- · Option for removal of product packaging after installation

# The B&R Engagement Loop (Project Services)

In order to engage successfully with our project customer's, B&R representatives follow a structured service plan.

We take our responsibilities seriously and take pride in fostering collaborative, open relationships with our project customers. Our approach ensures a comprehensive understanding of each project's unique needs, allowing us to deliver tailored solutions that meet diverse applications and technical specifications.

- Our process begins with INVESTIGATION. Before reaching out to a customer or responding to an enquiry, we conduct thorough research into the customer, their project, and any relevant stakeholders.
- The next step is **UNDERSTANDING**. We engage in detailed discussions with the customer to fully grasp their current challenges and future project goals. These conversations help us identify how our product solutions can address their specific needs.
- With this valuable insight, we move to the third action: SCOPING.
  We collaborate with our in-house design, engineering, and
  estimating teams to assess the project requirements, prepare
  quotes, and create any necessary drawings.
- 4. Once we have developed a tailored solution, we address any potential variations and proceed to the fourth action: AGREE. Once all aspects are finalised and signed off, we move forward with manufacturing and equipment integration.
- 5. The fifth action is **DELIVERY.** We ensure that the finished product is shipped to the site in accordance with agreed timelines.
- Finally, to continuously improve our service, we conduct an EVALUATION. We reflect on the project and, depending on its size and scope, seek customer feedback to confirm our performance and identify areas for improvement.

# **Accreditations & Compliance**

At B&R, quality and value are just the beginning. We strive to deliver quality products developed and manufactured by a team dedicated to excellence, backed by standards, approvals and industry accreditations.

ISO 9001:2015

Every B&R facility undergoes external audits to ensure compliance with strict ISO9001 standards. Our products are rigorously inspected at the end of the production line to guarantee they meet the demands of their intended environment and application.

ISO 14001

**§** SAI GLOBAL

ISO 14001:2015

Sets out the criteria for an environmental management system. It maps out a framework that a company or organisation can follow to set up an effective environmental management system.

ISO 45001:2018

An externally audited Occupational Health and Safety Management System.

RoHS

The RoHS directive aims to restrict certain dangerous substances commonly used in electronic and electronic equipment.

# ASSDA

ASSDA

Australian Stainless Steel Development Assoc.

The Australian Stainless Steel Development Association provides comprehensive technical information on stainless steel. This includes information for users, equipment manufacturers and stainless steel suppliers.

B&R's Infinity 3G range is a smart, national approach to metering providing a modular or pre-configured solution for power distribution and metering applications up to 630Amps.

#### **FEATURES**

- · Complies with all Australian Switchboard Standards.
- Meets and exceeds all National Authority Regulations for power distribution and metering applications up to 630Amps.
- Simple design to reduce errors and call backs.
- · Easily assembled saving time and labour.
- Tested to IEC 61439 and AS/NZS 3439 and compliant with AS/NZS 61439 the Australian standard for switchboards.
- Enclosures to suit all environmental conditions and are available in IP66, IP34 and IP2x.
- · Metric Matrix modular grid system makes switchboard design quick and compact.
- · One fixing screw fits all modules reducing assembly time.
- · Hinged escutcheons improve safety during maintenance.
- Escutcheons and panels are interchangeable and allow for either left or right hinging.
- · Special door hinging allows door to be left or right hinged.
- Loose supply, pre-assembled or pre-wired options to suit your time and budget.
- · Manufactured from zinc coated steel, 316 stainless steel and aluminium.

# **COMPLIANCE**

Do you require a solution that complies with all National Supply **Authority Regulations?** 

# **DESIGN**

Specialist engineers work closely with customers to deliver custom solutions or standard off the shelf alternatives.

# **MODULAR**

A simple design that can be easily assembled— one screw fits all modules.

# **DELIVERY**

WAREHOUSES

350 staff

# **Compliance Testing, Specifications & Test Reports**

#### Infinity 3G: Designed for Safety and Compliance

At B&R, safety is our foremost priority - even before functionality. Our innovative switchboard designs are developed with safety as a prime focus and in full alignment with the latest Australian and international Standards.

Infinity 3G is one of the few metering switchboard systems on the market that can be demonstrated to meet - and in many cases exceed - the most current Standards requirements.

#### The Manufacturer's Responsibility

Designing and assembling a switchboard involves a range of technical decisions, each of which must support overall safety and long-term reliability. Every installation presents unique requirements that must be carefully considered during the design phase.

This specification sheet defines the performance and design limits of the Infinity 3G modular system and should be treated as the boundaries of its application.

#### **Standards and Compliance**

Designers, assemblers, installers and contractors must adhere at all times to the Australian Wiring Rules (AS/NZS 3000), which reference a range of supporting standards, including AS/NZS 61439.

**AS/NZS 61439:** Low-voltage switchgear and controlgear assemblies outlines detailed compliance criteria to which the Infinity 3G system has been designed. All relevant type testing has been conducted by NATA-accredited laboratories, ensuring independent verification of compliance.

The table below outlines the applicable standards and Infinity 3G's verified compliance.

#### **Enclosure Series**

Degree of Protection	Econo IP2X	Centro IP34	Primo IP66	Units
Rated voltage (Un)	690	690	690	V
Rated operational voltage (Ue)	480	480	480	V
Rated insulation voltage (Ui)	690	690	690	V
Rated impulse withstand voltage (Uimp)	6000	6000	6000	V
High voltage withstand	3500	3500	3500	V
Power frequency withstand voltage	2000	2000	2000	V
Rated current of the ASSEMBLY (InA)	630	630	630	Α
Rated peak withstand current (lpk)	50	50	50	kA
Rated short-time withstand current (lcw)	36	36	36	kA
Rated conditional short-circuit current (Icc)	36	36	36	kA
Rated frequency (fn)	50	50	50	Hz
Pollution degree	3	3	3	
Type of earthing system	MEN	MEN	MEN	
Mechanical impact protection	IK10	IK10	IK10	
Clearance	>14	>14	>14	mm
Creepage	>14	>14	>14	mm
Protective circuit	<25	<25	<25	mΩ

Individual modules and switchgear may have ratings less than the above and due consideration needs to be made when compiling a specification using these modules and switchgear.

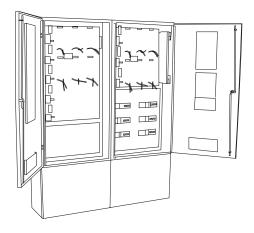

# **Statement of Compliance**

	Tests in accordance	ce with IE	EC 61439-1 a	and 2 Ed 2.0 2011 and AS/NZS3439.1
No.	Characteristics to be verified	Clause	Status / by	Compliance
1	Strength of material and parts	10.2		
	1a Resistance to corrosion	10.2.2	Compliant	The resistance to corrosion was tested using a representative sample. Plus ES report 103687
	1b Thermal stability	10.2.3.1	N/A	This clause refers to mainly plastic enclosures
	1c Resistance to abnormal heat & fire due to internal electric effects.	10.2.3.2	Compliant	All insulating materials supplied have been tested to 960° glow-wire standard. Plus ES report 103863
	1d Resistance to ultra-violet (UV) radiation	10.2.4	Compliant	UV ratings refer to plastic enclosures however metal powdercoated enclosures incorporates UV stabilisation. AksoNobel report 20LSR178
	1e Lifting	10.2.5	N/A	Lifting is verified by test, if required. Generally only related to larger switchboards to which lifting mean (lugs) have been provided. Plus ES report 103687
	1f Mechanical impact	10.2.6	Compliant	IK10. Metal enclosure systems have been tested to exceed IK 10 (20 Joules).
	1g Marking	10.2.7	Assembler	Markings must be verified by test. Tests are performed by rubbing with water and petroleum spirits: generally done by the Switchboard Builder (Assembler).
2	Degree of Protection	10.3	Compliant	IP66; Ingress Protection (IP) rating needs to be verified by test or by assessment. SIMTARS report NE16/0025
3	Clearances	10.4	Compliant	Clearance and creepage can only be verified by test. Switchboard Builders
4	Creepage distances	10.4	and Assembler	(Assembler) must maintain compliance by ensuring correct clearance and creepage distances are maintained at >8mm (Uimp=8kV) and >16mm (Ui=1kv) respectively. AUSGRID report 103484
5	Protection against electric shock and integrity of protective circuits:	10.5		
	Effective continuity between the exposed conductive parts of the ASSEMBLY and the protective circuit.	10.5.2	_ Compliant	Equipotential protective earth bonding points are required to be verified by test to less than 0.1ohm. Infinity 3G enclosure designs have been tested by AUSGRID. Report 103484
	Short-circuit withstand strength of the protective circuit	10.5.3	and Assembler	Infinity 3G enclosures are provided as a basic empty enclosure and as such protective circuit verification has not been tested as internal configurations are not known. Verification may be by test.  AUSGRID report 103484
6	Incorporation of switching devices and components			Points 6, 7 and 8 are largely the responsibility of the Switchboard Builder (Assembler). It is a requirement that the Assembler follow and adhere to
7	Internal electrical circuits and connections		– – Assembler	guidance from the original manufacturers, such as B&R and the switchgear
8	Terminals for external conductors		, , , , , , , , , , , , , , , , , , , ,	manufacturer. Switchboard Builders need to be aware of the Standard's requirements for these verification points and incorporate these into complete design verification documentation.
9	Dielectric properties:	10.9		
	9a Power-frequency withstand voltage  9b Impulse withstand voltage	10.9.2	_ Compliant	Infinity 3G enclosures are provided as a basic empty enclosure and as such protective circuit verification has not been tested as internal configurations are not known. Verification may be by test.  AUSGRID report 103484
10	Temperature-rise limits	10.1	Designer or Assembler	Temperature-rise can be determined by test or by comparison or by calculation. Temperature-rise methods provided in AS/NZS 60890 can be used for switchboards not exceeding 1600A rating. The Infinity 3G range does not exceed 1600A and therefore AS/NZS should be used by the Designer.
11	Short-circuit withstand strength	10.11	Compliant	Enclosures with a fault rating greater than 10kA need to be compliant with AS/NZS 61439. Verification can be done by test or comparison with a reference design. The Infinity 3G range have been tested. AUSGRID report 103484
12	Electromagnetic compatibility (EMC)	10.12	Assembler	Equipment installed in switchboards shall comply with the immunity requirements of the relevant product or generic EMC standard. The Switchboard Builder (Assembler) shall obtain from the device and or component manufacturer the specific performance criteria of the equipment based on the acceptance criteria given in the relevant standard.
13	Mechanical operation	10.13	Assembler	This verification testing need NOT be done on devices that have already been type tested according to their relevant product standard. Only if their mechanical operation has been modified does the assembly need to be re-tested by cycling in 200 times.

# **Supply Options**

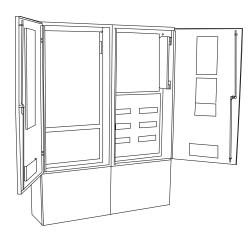

Providing a customisable, modular switchboard system, the Infinity 3G range is the ultimate in versatility. Complying with all State Supply Authority Rules and Regulations, Infinity 3G is suitable for multiple tenancy, domestic and commercial installations up to 630A.

#### Option 1: Pre-Configured + Pre-Wired

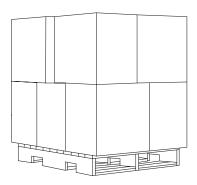

- Metalware fully assembled
- Schneider or Terasaki switchgear options
- All wiring included
- Modular design allows optimal placement
- 100% fit-for-purpose, ready for installation
- Engineering solutions can be provided
- Supplied fully AS/NZS 61439 compliant

#### Option 2: Pre-Configured

- · Metalware fully assembled
- Save on assembly time
- · General arrangement drawing supplied
- Switchboard builder needs to verify design

#### Option 3: Loose Supply

(modular to customer specifications)

- Supplied loose
- Contractor build
- · General arrangement drawing supplied

At B&R, we have created a range of pre-configured modular switchboard solutions to suit supply authority rules and regulations.

B&R's Infinity 3G pre-configured range offers customers a standardised solution with short lead times, providing smarter, more efficient designs that comply with relevant state Authority Rules and Regulations.

These pre-configured designs are available in two formats:

- Metalwork only
- Fully assembled and pre-wired, ready for installation

All pre-wired solutions are assembled by B&R's in-house electrical integration team, ensuring the switchgear and wiring are installed to specification, making the switchboard fully fit-for-purpose and installation-ready.

#### State-Specific Availability

Pre-configured and pre-wired Infinity 3G solutions are available in the following states:

- Queensland
- · New South Wales
- Victoria
- · South Australia

Each state's solution features a standardised configuration tailored to local regulatory requirements. These products are particularly suited for multi-tenancy residential applications, with multiple metering positions included as standard.

For further information or to discuss your specific requirements, please contact your local B&R Sales Representative.

#### Queensland

- · Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions Wind actions.
- Trouble free direct baying of enclosures to accommodate additional configurations.
- Manufactured from 1.6mm zinc coated steel
- · Powdercoated Light Grey RAL7035.

#### Comes standard with:

- Large 3mm aluminium gland plate
- · Stainless steel door hinges
- · 3-point locking
- Recessed padlockable swing handle and a standard switchboard 92268 keyed cylinder
- · Document holder
- Roof sunshade provided on CT switchboards
- · Multiple Earth Neutral (MEN) provided
- Includes AS/NZ 61439 compliance documentation

Victoria

- · Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions Wind actions.
- Trouble free direct baying of enclosures to accommodate additional configurations.
- Manufactured from 1.6mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

#### Comes standard with:

- · Large 3mm aluminium gland plate
- · Stainless steel door hinges
- · 3-point locking
- Recessed padlockable swing handle and standard Victorian CL001 keyed cylinder
- · Document holder
- Roof sunshade
- · Multiple Earth Neutral (MEN) link provided
- Includes AS/NZS 61439 compliance documentation.

### **Primo Range**

- Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions Wind actions.
- Wide double door enclosures have no central mullion allowing full width accessibility.
- Special door hinging allows field reversible doors to be left or right hinged.
- Full height open sides allow trouble-free direct baying of enclosures (side covers to be purchased separately).
- Manufactured from
  - 1.6mm zinc coated steel,
  - 1.5mm 316 stainless steel or
  - 2mm aluminium.
- Powdercoated Light Grey RAL7035.

#### Comes standard with:

- · Large 3mm aluminium gland plate
- · Stainless steel door hinges
- Padlockable swing handle door lock with optional 92268 or CL001 cylinder provided
- · Document holder
- 3-point locking
- Top and bottom mullion rail
- Includes AS/NZS 61439 compliance documentation

#### **GALVANISED PLINTH**

- 50mm Ø holes allow pipe to be used for slinging during installation.
- Corrosion proof fully galvanised rigid 3mm sheet steel plinth.

  Plinth comes pre-fitted with pallet for easy transportation and stability
- Single sheet steel construction provides superior rigidity and strength
- Mounting brackets allow securing of plinth beyond the perimeter of the enclosures, however 100mm clearence is needed on all sides for this feature.

### **Project Profile**

Padstow Gardens, Eight Mile Plains, QLD

Padstow Gardens is a residential development located in Eight Mile Plains, South of Brisbane, consisting of eighteen residential townhouses.

A solution was required to supply an IP rated, modular switchboard solution for a multiple tenancy, central location within the complex. This project consisted of two (2) stages.

D&L Williamson Electrical is a family owned business with over 25 years' experience in the building industry. Based in south east Queensland, D&L provide a range of electrical services, including commercial projects, renovations, security installations and switchboard upgrades.

D&L were contracted to complete electrical works for Padstow Gardens

As part of stage one, D&L required a main switchboard with the capacity to house CT metering and private metering for nine of the eighteen residential townhouses within the complex.

We appreciate the high level of after sales service that we receive from B&R sales representatives.

For stage two, a second main switchboard was required for all remaining townhouses located in a different area of the complex.

The main switchboard needed to be installed outdoors, and therefore IP66 rating was specified for total protection against the ingress of dust and water.

B&R provided an Infinity 3G modular switchboard solution for this project. Utilising B&R's wholesale partners, the entire product solution was supplied through CNW Electrical Wholesale and Energy Solutions located in Geebung.

The current ratings at Padstow Gardens were also considered for this project as they were expected not to exceed 125 Amps.

B&R and D&L Williamson Electrical selected the Primo range as it met all the needs of this project including the IP66 protection rating required for installation outdoors.

B&R's Infinity 3G product range is a modular solution for commercial and residential applications up to 630 Amps.

B&R designed, manufactured and assembled the switchboard at their facility at Heathwood, south of Brisbane.

B&R delivered the switchboard over to D&L to wire and complete the installation on site. This kept the lead time of the project to a minimum, and ensured that D&L could offer their customer a time effective solution.

D&L and B&R have worked closely together in the past on projects including Aspect on Archer in Toowong, and Southpoint, a new apartment development in Moorooka.

Michael from D&L Williamson appreciates the quality of after-sale service they receive from B&R sales representatives. With external time constraints to be met, D&L value the quick turn around with any changes or additions needed.

"With power coming on soon, we can't have someone taking weeks to get something done – it needs to be sorted promptly". D&L are comfortable that any questions they have will be addressed quickly and thoroughly. B&R and D&L look forward to working together in the future, including on a new development at Albany Creek with similar requirements to Padstow Gardens

## **Centro Range**

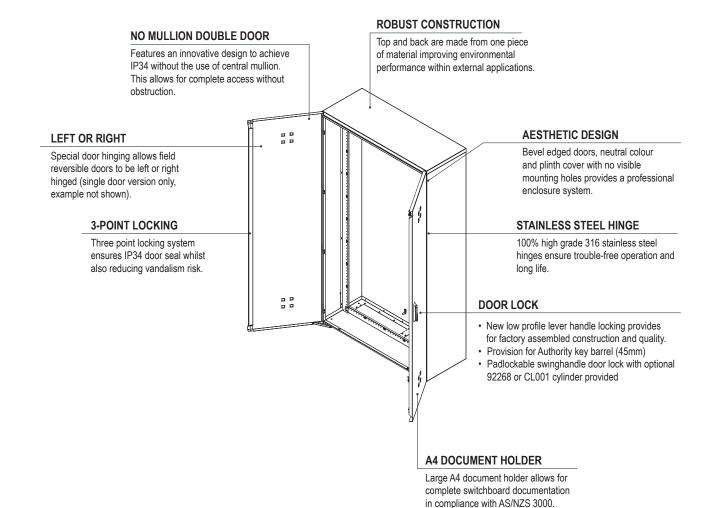

- · Robust construction to ensure long service life.
- Region C wind rated to AS1170.2-2002: Structural design actions – Wind actions.
- · Full width enclosure with no centre mullion.
- Special door hinging allows field reversible doors to be left or right hinged.
- Manufactured from 1.2mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

#### Comes standard with:

- 3mm aluminium gland plate
- · Stainless steel door hinges
- · 3-point locking
- Padlockable swing handle door lock with optional 92268 or CL001 cylinder provided
- Document holder
- · Top and bottom mullion rail

### RAISED ACCESS PLINTHS

- High performance galvanised steel ensures corrosion-free operation.
- Vandal resistant front cover with no visible mounting points.
- Raising plinths only used for 1270mm high enclosures.
- Powdercoated RAL7035

#### **GALVANISED PLINTHS**

- 50mm Ø holes allow pipe to be used for slinging during installation.
  Corrosion proof fully galvanised rigid 3mm sheet steel plinth.
- Plinth comes pre-fitted with pallet for easy transportation and stability
  Single sheet steel construction provides superior rigidity and strength
- · Mounting brackets allow securing of plinth beyond the perimeter of the enclosures, however 100mm clearence is needed on all sides for this feature.
- Powdercoated black

## **Econo Range**

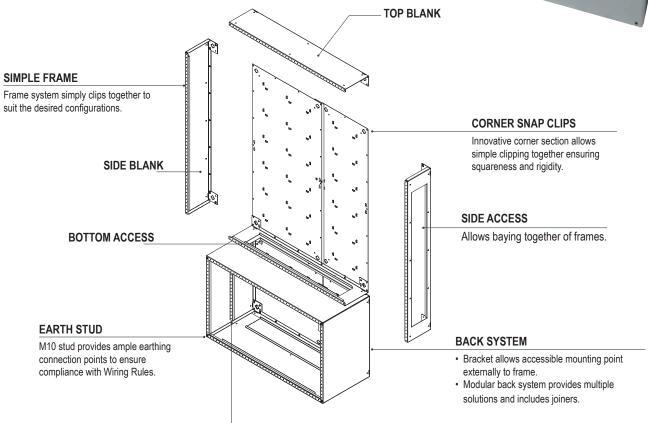

- · Robust construction to ensure long service life.
- Frame system clips together to the desired configurations.
- Wide selection of top, bottom pair and side pair (set of 2) that can have either closed (blank) or opening (access) features allowing most combinations to meet application demands.
- Manufactured from 1.6mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

The 4D deep frame has internal rails to allow for equipment mounting.

The frame is symetrical allowing it to be rotated 90° once assembled to achieve other size configurations. For example a 12H x 14W can become 14H x 12W simply by rotating.

**INTERNAL RAILS**

Part Number	Description
TGFWBRK	Wall mounting bracket (set of 4)
TGY250M5	M5 Hex head taptite screws (Bag of 250)

## **Mullion**

- Designed to create module spaces.
  Single width mullion is used throughout.
  Manufactured from 1.6mm zinc coated steel.
  Powdercoated Light Grey RAL7035.

### **ORDERING GUIDE**

Part Number	Module Size (dm)	Width (mm)
TGYMUL02	2	50
TGYMUL04	4	50
TGYMUL06	6	50
TGYMUL08	8	50
TGYMUL10	10	50

Part Number	Description
TGYFXEK	Fixed escutcheon mounting kit (includes an additional set of brackets and tubenuts)
TGYEPLK*	Escutcheon padlock brackets to suit all escutcheons (Bag of 5)
TGY250M5	M5 Hex head taptite screws (Bag of 250)

<sup>▲</sup> Available on request.

## **Escutcheons**

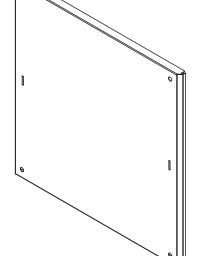

- Unique design, multi-function escutcheon provides multiple options including:
  - Left or right hinged
  - Sealable
- Padlockable (kit required, sold separately)
   Fixed (kit required, sold separately)

  Specially designed tubenuts ensure earthing continuity of escutcheon.

  Bevelled edges provide a professional finish.
- Manufactured from 1.2mm zinc coated steel. Powdercoated Light Grey RAL7035.

### **DIN Rail Modules**

- Keyhole attachment points allow for a one person installation and assembly operation.
- Unique design, multi-function escutcheon provides multiple options including:
  - Left and right hinged
  - Sealable
  - Padlockable
  - Fixed (kit required, sold seperately)
- Large link bar tunnels to accept up to 25mm².
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

<sup>▲</sup> Available on request.

## **Segregation Modules & Dividers**

- Keyhole attachment points allow for a one person installation and assembly operation.
- Knockouts are laser cut to minimise assembly efforts.
- This module fits behind equipment modules to provide segregation and to increase forms of internal separation.
- Four studs allow the fitting of a mounting pan for equipment (excluding TGYSG0402).
- Additional venting is provided at top and bottom to facilitate heat dissipation.
- · Mitred corners allow easier access to cables.
- Use segregation module with a DIN rail module to form an Authority Module.
- · Manufactured from
  - 1.6mm zinc coated steel
  - Insulated phenolic resin black panel
- Powdercoated Light Grey RAL7035.

## **Segregation Modules & Dividers**

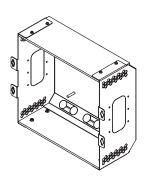

Module Divider (size 6 shown) Each divider is supplied with 2 edge protectors that fit into the knock-out areas to protect cables.

Part Number	Module Height	Depth (mm)*
TGYDV02	2	196
TGYDV03	3	196
TGYDV04	4	196
TGYDV06	6	196

<sup>\*</sup> Full enclosure depth

Segregation Module (6x6 shown)

All segregation modules fit in and behind all switchgear modules. This allows an increase in the form factor or simply seal-off certain areas of the switchboard while maintaining IP2X and IPXXB. Top and bottom are

insulated black panel to allow easier customisation for cabling. Ventilation is also provided to ensure switchboard temperature rise limits are not exceeded. Escutcheons need to be ordered separately if required.

Lloight		
neight	Width	Depth (mm)*
4	2	160
4	4	160
4	6	160
6	4	160
6	6	160
8	6	160
10	6	160
12	6	160
	4 4 6 6 8 10	4 2 4 4 4 6 6 6 4 6 6 8 6 10 6

<sup>\*</sup> Allows 40mm space behind segregation module and back of enclosure. ▲ Available on request.

#### **ACCESSORIES**

Part Number	Description
TGY250M5	M5 Hex head taptite screws (Bag of 250)
TGYEP*	Clip-on cable entry edge protector (5 sets)

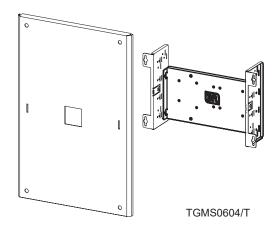

▲ Available on request.

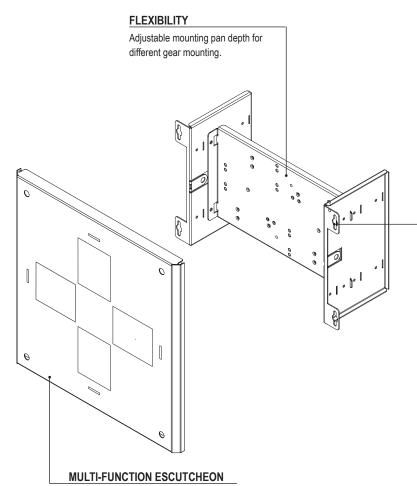

## **Switchgear Modules**

- Keyhole attachment points allow for a one person installation and assembly operation.
- Dual or single MCCB fitting with laser cut escutcheon knockouts allows multiple position of switchgear.
- Open frame structure allows for easy wiring. Manufactured from

  - 1.6mm galvanised steel (internals)
     1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

#### **KEYHOLES**

Keyholes allow easy placement of modules into enclosures without having to have three hands.

options including: Left and right hinged Sealable

Unique design provides multiple

- Padlockable
- Fixed (kit required)

Switchgear devices are NOT included and should be ordered separately from the switchgear manufacturer.

### **Chassis Modules**

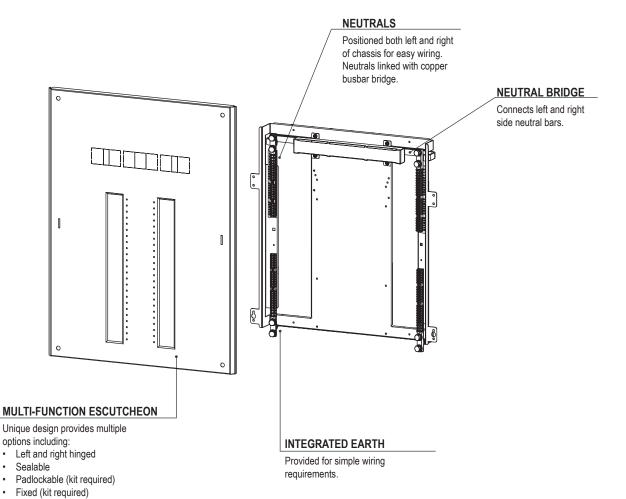

- Keyhole attachment points allow for a one person installation and assembly operation.
- Open frame structure allows for easy wiring from MCBs to outgoing circuits.
- All circuits are numbered according to AS/NZS 3000.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

#### Comes standard with:

- · Pre-cut escutcheon
- · Earth and neutrals on each side
- · Neutral bridge to connect left and right neutral

### **CT Modules**

- Keyhole attachment points allow for a one person installation and assembly operation.
- CT module is the same size for 400A and 630A CTs.
- Transparent screen covers are provided as an accessory for compliance to regulatory rules and improved safety.
- Potential fuse bracket provided as a standard inclusion.
  400A version suits all S-Type CT's for either 200A or 400A applications.
- 630A version suits T-Type CT's.
- Alternative CT mounting positions for Queensland regulations.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

Pre-Drilled CT Meter Panels

Part Number	Description
TGYFXEK	Fixed escutcheon mounting kit (includes an additional set of brackets and tubenuts)
TGYEPLK <b>⁴</b>	Escutcheon padlock brackets to suit all escutcheons (Bag of 5)
TGY250M5	M5 Hex head taptite screws (Bag of 250)
TGY10ESB▲	M5 extended sealing bolt (Bag of 10)
TGYEP▲	Clip-on cable entry edge protector (5 sets)

<sup>▲</sup> Available on request.

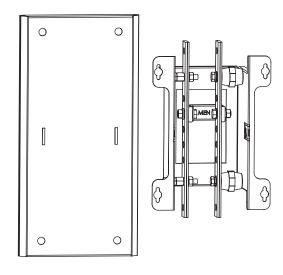

## **Link Modules**

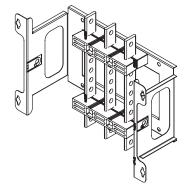

- Keyhole attachment points allow for a one person installation and assembly operation.
- Various cable sizes on all types of link modules ensures flexibility.
- Incomer links allow simplicity for incoming termination of cables, reducing errors.
- Provides for multiple cable terminations.
- Manufactured from
  - 1.6mm galvanised steel (internals)
  - 1.2mm zinc coated steel (escutcheon)
- Unpainted (internals) or powdercoated Light Grey RAL7035 (escutcheon).

#### Comes standard with:

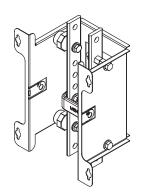

- · Hinged escutcheon
- Label (MEN links only)

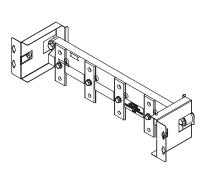

MEN LINKS

▲ Available on request.

## **Covered Links**

- Suitable for domestic and commercial metering applications.
  Designed to comply with AS 5112.
  Exceeds AS/NZS 61439 requirements for
- 960° glow wire testing.
  Generous tunnel sizing for large cables.
- Sealable.
- Various colour covers to identify active conductors.
- Robust polycarb plastic

<sup>▲</sup> Available on request.

### **Panels**

- Panels can be pre-drilled to suit authority meter patterns.
- Can be supplied blank for free placement of meters.
- High grade paper phenolic resin black panel (Asbestos Free) Waterproof (hydroscopic).
- Exceeds 960°C glow-wire test requirements as per the Australian Standards AS/NZS 61439.
- Fitted with hinges to allow either left or right hand hinging.
- Requires matching enclosure side male hinge kits to suit application requirements.
- Can be made as a fixed panel (not hinged) using fixed panel mounting kit (TGPFXPK).
