Since 1955, B&R has built a reputation for excellence in the design and manufacture of enclosures. Everything we have learnt in that time, we've poured into our products and relationships.

B&R Enclosures was founded by Dick Bridges in 1955, specialising in sheet metal fabrication, including electrical enclosures for domestic metering applications.

With little capital but great enthusiasm for operating his own business and a determination to succeed, Dick commenced operations in his backyard in Adelaide, South Australia.

It was this family determination that has sustained B&R's growth into manufacturing plants in Brisbane, Adelaide and Sydney, 8 locations nationally and an international network of distributors.

As a 100% Australian, family-owned business, B&R champions the virtues of quality, service and value. Combined with our unrivalled industry and application knowledge, we are in a unique position to meet the needs of our clients.

B&R Enclosures encompasses four divisions: Industrial, Data ICT, Hazardous Areas and Residential Commercial. Each division focuses on the unique needs of different market segments. Together, these divisions share the strengths, resources and experience of the founding company to provide attentive customer service, innovative design and superior quality products.

Some of the largest companies around the world use B&R as a major supplier. These include BHP Billiton, Rio Tinto and the Australian government, to name a few. We have enjoyed repeat business with the world's leading mining companies for over 20 years.

B&R Enclosures can offer extensive supply chain capabilities featuring supply from stock (ex our national warehouse network), supply of assembled to order solutions with short lead times, value adding services and cooperation with other suppliers to allow for integration of third party products into enclosures, racks or cabinets prior to shipment.

B&R is also experienced in arranging specialised freight, product delivery, installation and removal of packaging. We measure our service performance and can provide regular written reports if required. B&R also provides key account management and project management to ensure that we clearly understand and can anticipate the ongoing needs of our customers.

Our Vision

Our commitment to supporting the community, locally and abroad, is fundamentally grounded first and foremost in safety. Across all our projects we work to eliminate risk by ensuring that our products will both protect and maintain valuable assets but most importantly, keep people safe. With a growing plethora of electrical enclosure solutions available on the market and increasingly tough rules surrounding the safety and reliability of electrical installations, we go beyond just compliance to making safety the heart of our culture.

As a specialist manufacturer and supplier, we meet this challenge head on, providing an integrated approach to the delivery of complex projects requiring close collaboration and expertise. We proudly prioritise safety in all project planning and installation, from construction to completion. This allows B&R a reputation for excellence in providing greater certainty and value in the performance of project operations and facilities.

Our Core Values

Building Trust – We ensure that our employees (both internal and external) are trusted by customers as a partner who listens to their needs in order to meet their expectations in a reliable and consistent manner.

Commitment to Quality – We adhere consistently to standards to satisfy customer and user requirements whilst producing and providing products and services of the highest quality.

Participation – Collaboration plays an important role in generating creative thinking and problem solving.

Enthusiastic – Empowered to seek new opportunities to innovate and improve the B&R experience.

Ethical – An honorable approach underpins the core values and decision making made across all areas of the B&R business.

At B&R, we have been delivering safety for people and security for equipment since 1955. Our products are Made in Australia for Australian conditions.

Solutions for all environments

Product Solutions

B&R are proud to have supplied the Australian market with distinctive solutions to all Residential and Commercial applications. Our indepth experience and knowledge of the various State Authorities' requirements provides our customers with the knowledge that using our products delivers Safety, Simplicity, Quality and Confidence of Compliance with regulations. Fully assembled and wired solutions are available for more complex installations, providing customers with turnkey delivery.

At B&R, we not only manufacture and supply a range of enclosure solutions, but we can also customise the design to be 100% fit-for-purpose and ready for installation.

We offer a range of services to assist you when customising standard product to ensure that you have a product ready for installation. We understand that time is a major consideration on any project and we work with our customers to provide products on time and on budget.

We have established two value add divisions located within our manufacturing facilities at Heathwood, Brisbane and Riverwood, Sydney. We also have an established design and engineering division who will work with you to customise any standard product to ensure you have a product to suit your application requirements.

Our Services include:

- Door cutouts
- Cable entries
- Terminals and controls fitted
- Viewing windows
- Customised wiring
- Vent kits / sunshields fitted or punched
- Assembled-to-order / fitting of accessories

What this means for our customers:

- Customised product to suit the project
- Shorter lead times
- Available for small or large quantities
- One point of contact
- Standard product straight off the floor

Victoria Group Metering

Enclosures to suit VIC applications

- Designed for both single and multi-phase installations.
- Pre-wired and unwired solutions for multiple tenancy installations in all areas of Victoria.
- Pre-wired and ready to fit meter.
- Ample DIN space.
- Upgradeable to include supply capacity control
- Manufactured from 1.0mm galvanised steel to Z275.
- Powdercoated Light Grey RAL7035.

Comes standard with:

- 40A tenancy sub-main MCBs
- Meter fuse holders
- Service protection device fuse holders

B&R's smart, national approach to metering, **Infinity 3G** provides a modular solution for power distribution and metering applications up to 630Amps.

The only solution you need for compliance to Australian Standards and Supply Authority Regulations.

Infinity **3G** modular switchboard solutions

**The new Australian Standard
in modular switchboard solutions.**

The B&R Enclosures Infinity 3G product range.

OVERVIEW

B&R's Infinity 3G range provides a national approach to power distribution and metering. Comprehensively tested and certified to bring you a product of the highest quality.

Infinity 3G is designed to provide a modular solution for commercial and residential applications up to 630Amps.

THE DESIGN ADVANTAGE

- Complies with all new Australian Switchboard Standards.
- Meets and exceeds all National Authority Regulations.
- For power distribution and metering applications up to 630Amps.
- Simple design to reduce errors and call backs.
- Easily assembled saving time and labour.
- Tested to AS/NZS 3439 and compliant with AS/NZS 61439 — the new Australian standard for switchboards.
- Enclosures to suit all environmental conditions and are available in IP66, IP34 and IP2x.
- Metric Matrix modular system makes switchboard design quick and compact.
- One screw fits all modules reducing time to assemble and the number of people required.
- Hinged escutcheons improve safety during maintenance.
- Escutcheons and panels are interchangeable and allow for either left or right hinging.
- Special door hinging allows door to be left or right hinged.
- Loose supply, pre-assembled or pre-wired options to suit your time and budget.
