## About B&R Enclosures

Since 1955, B&R Enclosures has built a reputation for excellence in design and production, culminating in our position as Australia's largest enclosure manufacturer and electrical equipment integration specialist.

As an independent, 100% Australian family owned and operated business, we champion the virtues of quality, innovation, service and value. The emphasis on these aspects has sustained B&R's growth leading to Australian manufacturing and distribution facilities in Brisbane, Adelaide and Sydney and internationally in China and Saudi Arabia.

B&R's knowledge, precision, quality and unwavering commitment to creating repeatable solutions for our clients supports our position as preferred manufacturer for many private, government and commercial projects in some of Australia's harshest environments.

Our unrivalled industry and application knowledge puts us in a unique position to meet the needs of our clients. The business encompasses four divisions: Industrial, Data ICT, Hazardous Areas and Residential Commercial. Each division focuses on the unique needs of different market segments.

B&R regularly works with partners to provide integrated solutions for major infrastructure and mining projects. These include 'plug and play' switchboard solutions for Rio Tinto's Oyu Tolgoi mine, control stations for Ichthys on-shore LNG processing plant and Australia's NBN Rollout. Ongoing relationships and collaboration are results of our ability to articulate the customer's problem and combine previous experience and knowledge with compliance to local standards.

Electrical integration involves the installation, commissioning and testing of 3rd party components and we are adept at managing the acquisition and storage of technical components through a global supply chain that is structured, customised, agile, repeatable and results-based.

Project management and execution is effectively managed at B&R by the co-location of design, supervision, supply coordination and quality control along with manufacturing. Our incorporation of Industry 4.0 delivers real-time data to our project management teams, built around the requirements of individual projects.

Extensive investment in research and development includes an environmental testing facility focussing on climate control to support cooling solutions for equipment exposed to high ambient temperatures and solar radiation.

When utilised as designed, B&R's enclosures are built to out-perform against expectations.

Contact us today to find out how B&R can deliver reliable and trusted outcomes for your project.

## Our Locations

B&R Enclosures have purpose-built manufacturing facilities in three locations across Australia, as well as strategic locations in the Gulf and China.

### **Australia**

#### ***Brisbane (QLD)***

## Our Capabilities

Over the years as the company has grown, we have invested significantly in machinery, technology and testing to be able to provide capabilities which our customers benefit from in every order they place. Our current capabilities include:

- Purpose-built Australian facilities in Brisbane (18,000m<sup>2</sup>), Adelaide (4,000m<sup>2</sup>) and Sydney (1,874m<sup>2</sup>), providing local labour and logistics
- Complete in-house design and engineering services to assist with creating custom solutions
- End-to-end manufacturing, from coiled steel raw material to commissioning the end product, we provide efficiency and complete quality control
- Variety of substrates and high quality finishes including stainless steel, powder coated and zinc to suit even the most demanding application
- Modern machinery for any design to be formed and fabricated including automated sheet metal panel benders, punching and shearing centres, electrical equipment integration lines, press brakes, powder coat lines, fabrication cells and assembly lines
- Fully documented process available with full configuration management to support a detailed documentation experience
- Complete project management including supply chain, warehousing and logistics
- In-house and external testing for hazardous area electrical equipment and impact, IP, type testing, static load, seismic, wind load, salt spray, line inspection, shock, vibration, EMC and MIL-STD
- Continuous improvement with our environmental testing facility for ongoing research and development
- Existing supply agreements with leading OEMs and major raw products distributors supporting loyal and valued relationships.

## Our Supply Strategies

### Made to Stock

These products are available ex stock from all our sales & warehousing branches. Contact your local sales representative to discuss requirements.

### Assembled-to-Order

These products are assembled to order upon receipt of a customer order. All components required to build an ATO item cannot be sold separately and must form part of a kit. Standard lead time is 4-6 weeks from date of order.

### Made to Order

These products are manufactured according to a customer's specification. They are marked in our catalogues as "▲ Available on request" and have a standard lead time of 2-3 weeks.

### Engineered-to-Order

These products are a custom designed product that is 100% fit-for-purpose, delivered on-site and ready for installation. Our design & engineering team can customise an enclosure to suit the application requirements. Contact us for more information.

## Collaboration

- Convert customer requirements to product build specifications
- Work to customer delivery schedule
- Initiate procurement or consignment of stock allocations
- Supply of equipment configuration

## Complete Project Management

- One point of contact
- Responsive communication channels
- DIFOTIS - Delivered In Full On Time In Specification
- Accountability for the delivery of our commitment to customers

## Electrical & Equipment Integration

- Wiring and equipment installed to exact requirements
- Management of free issue, consigned and/or B&R sourced components and equipment
- Stock reporting and job allocation

## Testing & Reporting To Customer Specifications

- Digital reports of product testing and acceptance
- Serialised codes to customer requirements, digital signature, component traceability and unique identifiers
- Real time quality assurance authorisation, approval and confirmation

## Customer Specific Logistics

- Storage and warehouse management
- Site delivery logistics
- Option for removal of product packaging after installation

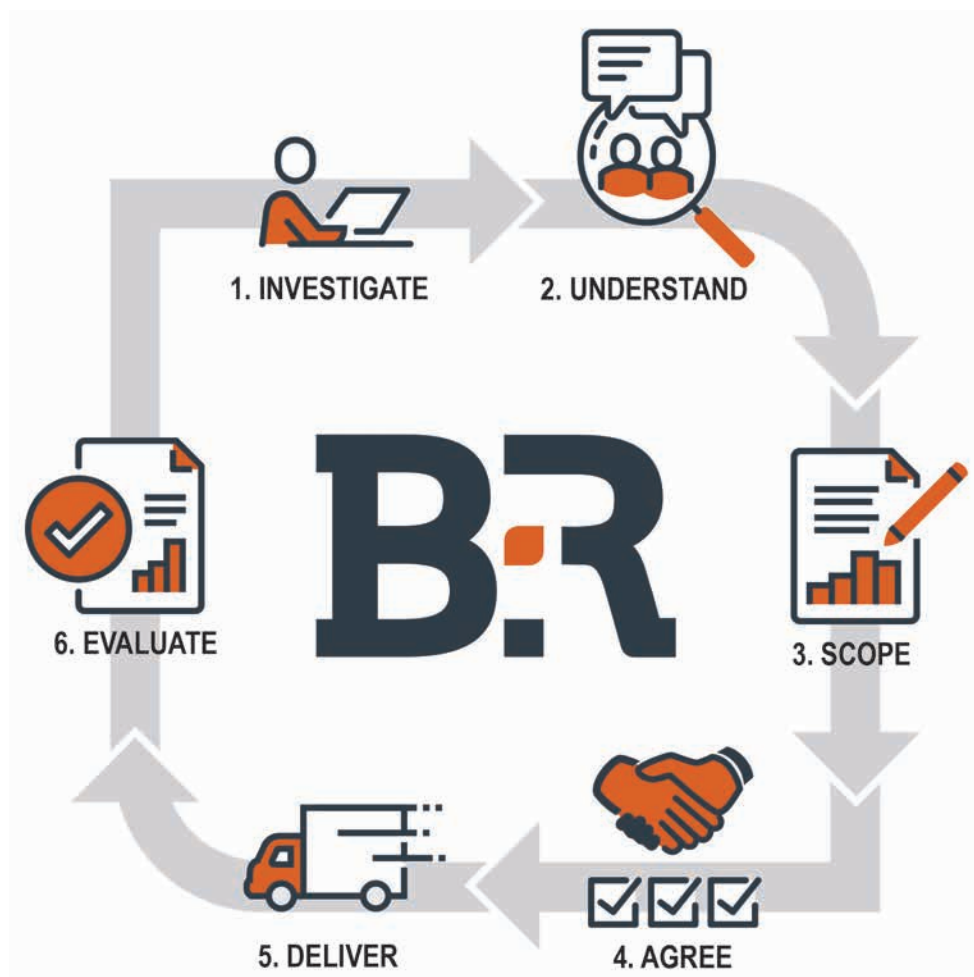

## The B&R Engagement Loop (Project Services)

In order to engage successfully with our project customer's, B&R representatives follow a structured service plan.

We take our responsibility seriously, and pride ourselves on the collaborative and open relationships we undertake with our project customers. This ensures we understand and provide value as our customer's needs vary greatly across the different types of project application and technical requirements.

1. Our first action before we reach out or after a customer had reached out to us, is to **INVESTIGATE**. This includes researching the customer/ project and any other relevant stakeholders.
2. The second action of **UNDERSTAND** is when we speak to the customer at length about their issue and challenges for current and future projects. From these discussions we can begin to see how our product solutions can solve the customer's issues and challenges.
3. We take our newly acquired customer knowledge back to our in-house design, engineering and estimating teams for our third action to **SCOPE** the work, and prepare quotes and drawings as required.
4. Once we have created the tailored offer for the customer we process any variations which might be needed before our fourth action of **AGREE**. With everything signed off we move into manufacturing and equipment integration.
5. Once the product solution is ready our fifth action of **DELIVER** takes place. We make sure the goods are shipped to site according to agreed upon timelines.
6. To learn from our experience and confirm our service level we take an **EVALUATION** action. This is when we reflect on the job we've completed and depending on the size and extent of the order we will seek customer feedback as well.

## Accreditations & Compliance

At B&R, quality and value are just the beginning. We strive to deliver quality products developed and manufactured by a team dedicated to excellence, backed by standards, approvals and industry accreditations.

Quality  
ISO 9001

ISO 9001:2015

Every B&R Enclosures manufacturing facility is externally audited to ensure that the quality of our products meet the stringent ISO9001 standards. B&R's products are carefully inspected at the end of lines during the manufacturing process to ensure that the enclosures will withstand their intended environment and application.

Environment  
ISO 14001

ISO 14001:2015

Sets out the criteria for an environmental management system. It maps out a framework that a company or organisation can follow to set up an effective environmental management system.

OHS  
ISO 45001

ISO 45001:2018

An externally audited Occupational Health and Safety Management System.

RoHS

The RoHS directive aims to restrict certain dangerous substances commonly used in electronic equipment.

Australian Stainless Steel  
Development Assoc.

ASSDA

The Australian Stainless Steel Development Association provides comprehensive technical information on stainless steel. This includes information for users, equipment manufacturers and stainless steel suppliers.

# Incline SR

## Mining and Industrial Enclosures

- Designed for rugged industrial applications including local control stations, mini control consoles or motor isolators.
- Suitable for mine sites and sugar mills.
- 30° sloping roof and 20mm overhang to prevent build up of solids.
- Specially designed gutter system.
- Conformity, Approvals:
  - Lloyds Register #06/10007 (E2)
- Region D wind rated to AS1170.2-2002: Structural design actions - Wind actions
- Manufactured from 1.5mm thick 316 stainless steel.
- N4 surface finish or powdercoated X15 orange.

Comes standard with:

- 2mm steel mounting pan powdercoated white
- Stainless steel gland plate
- Mounting flanges top & bottom
- Stainless steel lock with 7mm square stainless steel insert (NI020/S)
- Door rails
- Earth strap kit

## TECHNICAL DRAWING

# Pilbara SP – Zinc Coated Steel

## Mining and Industrial Enclosures

- Designed in sizes suitable for the most common mining, mineral processing and infrastructure projects.
- Typically used in local control stations, mini control consoles or motor isolation control stations.
- 30° sloping roof to prevent build up of water and solids.
- Lifting lugs conform to AS4991: *Lifting Devices*.
- One (1) tonne SWL on each lifting lug (excluding SP040425).
- Easy installation with top and bottom mounting flanges.
- Conformity, Approvals:  
Lloyds Register #06/10007 (E2)
- Region D wind rated to AS1170.2-2002: Structural design actions - Wind actions
- Manufactured from 2mm thick zinc coated steel.
- Powdercoated X15 Orange.

Comes standard with:

- 2mm steel mounting pan powdercoated white
- Chrome steel padlockable swing handle with LockSock®
- 3-point locking (excluding SP040425 range)
- 6mm aluminium gland plate
- Lifting lugs (excluding SP040425 range)

#### DID YOU KNOW?

Retrofitted sunshades provide extra protection against rising temperatures inside an enclosure. Also available are enclosures fitted with sunshades. See **Pages 16-19** for more information.

See **Pages 32-33** for more information about B&R's range of lighting solutions or contact your local sales representative to discuss your requirements.

#### DID YOU KNOW?

Retrofitted sunshades provide extra protection against rising temperatures inside an enclosure. Also available are enclosures fitted with sunshades. See **Pages 16-19** for more information.

See **Pages 32-33** for more information about B&R's range of lighting solutions or contact your local sales representative to discuss your requirements.

# Pilbara SP with Sunshades – Zinc Coated Steel

## Mining and Industrial Enclosures

- Designed for the most common mining, mineral processing and infrastructure projects.
- used in local control stations, mini control consoles or motor isolation control stations.
- 30° sloping roof to prevent build up of water and solids.
- Lifting lugs conform to AS4991: *Lifting Devices*.
- One (1) tonne SWL on each lifting lug (excluding SP040425).
- Easy installation with top and bottom mounting flanges.
- Conformity, Approvals - Lloyds Register #06/10007 (E2)
- Region D wind rated to AS1170.2-2002: Structural design actions - Wind actions
- Powdercoated X15 orange and manufactured from
  - Enclosure - 2mm thick zinc coated steel
  - Sunshades - 1.6mm thick zinc coated steel.

Comes standard with:

- Sunshades – top, door and both sides
- Steel mounting pan powdercoated white
- Chrome steel padlockable swing handle with LockSock®
- 3-point locking (excluding SP040425 range)
- 6mm aluminium gland plate
- Lifting lugs on enclosures (excluding SP040425 range)

## Mining and Industrial Enclosures

- Typically used for local control stations, mini-control consoles and motor isolators in conveyor runs.
- The sloped face creates an ergonomic interface when fitted with pushbuttons and control equipment.
- 15° sloping roof and 20mm overhang to prevent build up of solids.
- Conformity, Approvals:  
Lloyds Register #06/10007 (E2)
- Manufactured from 1.5mm thick 316 stainless steel
- N4 surface finish.

Comes standard with:

- 2mm steel mounting pan powdercoated white
- 6mm brass gland plate
- Top and bottom mounting flanges
- Stainless steel lock with 7mm square stainless steel insert (NI020/S)
- Door stay and document holder
- External earthing stud
- Earth strap kit

## Mining and Industrial Enclosures

- INTERNAL ENCLOSURE**
- 15° forward sloping roof with extended roof and gutter system.
  - Mounting pan depth adjustable to provide flexibility for cable glands.
  - 2mm steel mounting pan powdercoated white.
  - 6mm aluminium gland plate.
  - Door rails.
  - Earth strap kit.
  - Padlockable stainless steel swing handle (IP060/S).
  - Manufactured from 316 stainless steel with N4 surface finish.

- SUNSHADE ENCLOSURE**
- Fully vented enclosure designed to protect enclosure from direct sunlight and reducing temperatures inside the enclosure.
  - 15° reverse angle sloping roof.
  - Large opening in bottom for maximum cable access and ventilation.
  - Key lockable stainless steel L handle keyed to 92268 (IP050).
  - Manufactured from 316 stainless steel with N4 surface finish.

## Mining and Industrial Enclosures

- Designed to house terminations, pushbuttons, isolators or switchgear in industrial or demanding environments such as washeries, processing and sampling stations.
- Is well suited to applications that require front and side mounted switching devices.
- 40° sloping roof and 40mm roof overhang reduces material build-up.
- Internal door rails fitted to ensure mounting flexibility.
- Lifting lugs conform to AS4991: *Lifting Devices*.
- One (1) tonne SWL on each lifting lug.
- Conformity, Approvals:  
Lloyds Register #06/10007 (E2)
- Manufactured from 1.5 to 2.0mm thick 316 stainless steel.
- N4 surface finish.

Comes standard with:

- Steel mounting pan powdercoated white
- Top and bottom mounting flanges
- Internal 6mm earth stud
- Lock dust cover with stainless steel lock with 8mm square slotted stainless steel insert
- Lifting lugs on 800mm & 1200mm high enclosures

See **Page 30** for a range of lock options available for the Bowen range.

#### DID YOU KNOW?

Retrofitted sunshades provide extra protection against rising temperatures inside an enclosure. Also available are enclosures fitted with sunshades. See **Pages 28-29** for more information.

See **Pages 32-33** for more information about B&R's range of lighting solutions or contact your local sales representative to discuss your requirements.

### TECHNICAL DRAWINGS

# Bowen Series with Sunshades

## Mining and Industrial Enclosures

- Designed to house terminations, pushbuttons, isolators or switchgear in industrial or demanding environments such as washeries, processing and sampling stations.
- Sunshades protect the internal equipment from the effects of the sun.
- Is well suited to applications that require front and side mounted switching devices.
- 40° sloping roof and 40mm roof overhang reduces material build-up.
- Internal door rails fitted to ensure mounting flexibility.
- Lifting lugs conform to AS4991: *Lifting Devices*.
- One (1) tonne SWL on each lifting lug.
- Conformity, Approvals:
  - Lloyds Register #06/10007 (E2)
- Manufactured from 1.5mm thick 316 stainless steel.
- N4 surface finish.

Comes standard with:

- Steel mounting pan powdercoated white
- Top and bottom mounting flanges
- Internal 6mm earth stud
- Lock dust cover with stainless steel lock with 8mm square slotted stainless steel insert
- Lifting lugs on 800mm & 1200mm high enclosures

# Enclosure LED Lighting

Our LED lighting solutions provide light inside an enclosure when visibility is required for both safety and efficacy.

High output, small form factor LED lighting. Up to 4 units can be daisy chained from the one power supply. Allows for the opening of full height swing frames or hinged escutcheons when fitted to the roof. The optional PIR movement sensor can be used for power efficiency as an automatic door switch. All light kits can be mounted directly onto 19" rack rails. In the absence of 19" rack rails a mounting kit is available to suit the enclosure size.

B&R's LED lighting solutions are applied to provide excess light within an enclosure and becomes a continuous light source to provide extra visibility.

- Energy saving up to 50% compared with traditional fluorescents under the same lux.
- Life span – over 50,000 hours
- Available in cool white, neutral white and warm white colour temperatures.
- Available in 12V and 24V options.
- Easy linking up to 36 watts per run.
- Easy to install.
- Low voltage — safe and efficient.
- Manufactured from aluminium with black plastic end caps and acrylic lens.
- Light source – SM3528 LED
- Operating temperature – -20°C to 40°C indoors

This information is provided as a guide only. Contact your local sales representative to discuss your requirements.

## Case Study

### DAMPIER SALT MINE

Port Hedland, WA

#### THE PROJECT

This project, located at Dampier in the Pilbara Region of Western Australia, included the construction of new conveyors, stacker reclaimers, hoppers and other equipment. The project budget was AU\$50 million, and was to be completed over nine to 12 months, by December 2004.

#### THE CHALLENGE

The application required robust enclosures to cover a range of environmental conditions. The enclosures also had to address Occupational Health and Safety (O.H.S.) with regard to marshalling enclosures located near conveyor belts and inspection walkways. Due to the tight schedule of the project, the customer required fitting out of enclosures to specification, on time and at a competitive price.

#### THE SOLUTION

B&R supplied their standard Pilbara SP, along with a modified skinny version of the Pilbara, & painted/modified Incline SR enclosures. The sloping roof of Pilbara SP and Incline SR is designed to reduce the hazard of dust build-up on top of the enclosures.

Universal NI and Connector TE enclosures were also used. B&R's Western Australian value add section was involved in much of the fit-out, as was Moeller, using B&R painted stainless steel and zinc coated enclosures.

#### THE RESULT

This project was successfully delivered on time and to specification, meeting the consultant and end user's expectations.

Handwriting practice lines consisting of 30 horizontal lines.
