AUSRACK PLUS

Ausrack Plus
The ultimate in data cabinet flexibility

For over 60 years, B&R Enclosures has built a reputation for excellence in the design and manufacture of electrical enclosures and have become a leading supplier to the data, telco and communication industries.

About B&R's Data ICT Range

With a unique understanding of data and ICT applications, B&R manufacture and supply the highest quality 19" racks, data cabinets and enclosures, providing you with the ultimate in flexibility, whatever your requirements.

B&R is trusted by some of the largest companies in Australia and around the world including Telstra, NBN Co, and the Australian Government.

B&R manufactures and supplies a range of cabinets, racks and integrated solutions for applications including:
- Networking & Server
- Containment & Caging
- High Security/SCEC
- Cooling & Efficiency
- Small Office/Home Office
- Telecommunication
- Power Distribution

B&R's range of racks, data cabinets and enclosures have been designed by industry experts to ensure the products are optimised for reliability, security and ease of installation.

From design through to manufacture, B&R do not compromise on quality, using the best materials to ensure data centres are optimised for a long and productive life.

Solutions range from off-the-shelf standard products, customised and assembled-to-order solutions, electrical equipment integration, project management and supply chain management services. B&R's range of services to customise standard products, ensure a solution is delivered ready for installation and 100% fit-for-purpose.

B&R also offer a wide range of accessories that can be included to deliver a total solution, whatever your requirements.

About Ausrack Plus

Ausrack Plus range has been designed to ensure ease of installation and flexibility in application. An essential platform for versatile computing solutions, with a high load rating and inset corner posts.

The range combines versatility and strength with easy-to-use features. Manufactured from zinc coated steel, these cabinets are available in powdercoated textured matte black.

Ausrack Plus Server is suitable for use in large data room applications requiring a robust and fully featured server racking solution, with free flowing airflow.

Ausrack Plus Network comes with a front reinforced tinted acrylic window door as standard, and can be used in similar applications to the Ausrack Plus Server.

With removable side panels, and front and rear mesh doors, the Ausrack Plus Server and Network cabinets are designed for versatility in applications.

Ausrack Plus Frame has been designed for complete flexibility in medium to large data room applications. Able to be configured into suites and clad as per application requirements, the Ausrack Plus Frame is a versatile data rack solution.

There is a wide range of accessories available to suit any application requirements. Cable management can be incorporated into suites, available for all cabinets and frames. Designed to be mounted into the side of a cabinet, additional cable zones optimise accessibility and space available for cabling.

Further accessories available include privacy panels, fans, airflow efficiency products, power rails, and more.

DID YOU KNOW...
B&R offers a full range of accessories to compliment the Ausrack Plus range.

Ausrack Plus
The ultimate in data cabinet flexibility

Designed to accommodate medium to large patching networks and communications equipment, Ausrack Plus is the ultimate in flexibility.

What makes Ausrack Plus stand out?

Access around sides of installed equipment

Inset corner posts and cable zones allow access around the sides of the installed equipment, making the possibility of new installs and retro fit-outs easy.

Over 30 cable entry points in top and bottom

With multiple cable entry points in the top and bottom of the rack, finding a location to suit cabling requirements is an easy process.

Combine accessories to provide a total product solution

Combining the Ausrack Plus cabinets with a cable zone system, you can quickly and easily create cable looms and cross cabinet cabling. Add in the Ausrack cable management systems to ensure a clean install with maximum airflow to keep equipment cool.

Inset corner posts

A unique feature exclusive to B&R data products. With the inset corner posts as close to the equipment as possible, the frame is able to be fully welded to maintain security and stability.

The ultimate in flexibility

With no corner posts to limit the size of the doors, the Ausrack Plus frames can have a full width door fitted. Using B&R's mesh doors, the equipment installed receives maximum airflow through the cabinet.

| Side access for cable zones | Over 30 cable entry points | Range of accessories | Inset corner posts | Full width doors |
