About B&R Enclosures

Since 1955, B&R Enclosures has built a reputation for excellence in design and production, culminating in our position as Australia's largest enclosure manufacturer and electrical equipment integration specialist.

As an independent, 100% Australian family owned and operated business, we champion the virtues of quality, innovation, service and value. The emphasis on these aspects has sustained B&R's growth leading to Australian manufacturing and distribution facilities in Brisbane, Adelaide and Sydney and internationally in China and Saudi Arabia.

B&R's knowledge, precision, quality and unwavering commitment to creating repeatable solutions for our clients supports our position as preferred manufacturer for many private, government and commercial projects in some of Australia's harshest environments.

The business encompasses four divisions: Industrial, Data ICT, Hazardous Areas and Residential Commercial. Each division focuses on the unique needs of different market segments.

B&R regularly works with partners to provide integrated solutions for major infrastructure and mining projects. These include 'plug and play' switchboard solutions for Rio Tinto's Oyu Tolgoi mine, control stations for Ichthys on-shore LNG processing plant and Australia's NBN Rollout. Ongoing relationships and collaboration are results of our ability to articulate the customer's problem and combine previous experience and knowledge with compliance to local standards.

Electrical integration involves the installation, commissioning and testing of 3rd party components and we are adept at managing the acquisition and storage of technical components through a global supply chain that is structured, customised, agile, repeatable and results-based.
Project management and execution is effectively managed at B&R by the co-location of design, supervision, supply coordination and quality control along with manufacturing. Our incorporation of Industry 4.0 delivers real-time data to our project management teams, built around the requirements of individual projects.

Extensive investment in research and development includes an environmental testing facility focussing on climate control to support cooling solutions for equipment exposed to high ambient temperatures and solar radiation.

When utilised as designed, B&R's enclosures are built to out-perform against expectations.

Contact us today to find out how B&R can deliver reliable and trusted outcomes for your project.
Our Locations

B&R Enclosures have purpose-built manufacturing facilities in three locations across Australia, as well as strategic locations in the Gulf and China.

Australia

Brisbane (QLD)
Global head office, manufacturing, sales and warehousing

Sydney, NSW
Hazardous manufacturing, sales and warehousing

Adelaide, SA

Our Capabilities

Over the years as the company has grown, we have invested significantly in machinery, technology and testing to be able to provide capabilities which our customers benefit from in every order they place. Our current capabilities include:

- Purpose-built Australian facilities in Brisbane (18,000m^2), Adelaide (4,000m^2) and Sydney (1,874^2), providing local labour and logistics

- Complete in-house design and engineering services to assist with creating custom solutions

- End-to-end manufacturing, from coiled steel raw material to commissioning the end product, we provide efficiency and complete quality control

- Variety of substrates and high quality finishes including stainless steel, powder coated and zinc to suit even the most demanding application

- Modern machinery for any design to be formed and fabricated including automated sheet metal panel benders, punching and shearing centres, electrical equipment integration lines, press brakes, powder coat lines, fabrication cells and assembly lines

- Fully documented process available with full configuration management to support a detailed documentation experience

- Complete project management including supply chain, warehousing and logistics

- In-house and external testing for hazardous area electrical equipment and impact, IP, type testing, static load, seismic, wind load, salt spray, line inspection, shock, vibration, 2000A high current switchboard temperature rise type testing, EMC and MIL-STD

- Continuous improvement with our environmental testing facility for ongoing research and development

- Existing supply agreements with leading OEMs and major raw products distributors supporting loyal and valued relationships climate control and cooling solutions

Our Supply Strategies

Made to Stock
These products are available ex stock from all our sales & warehousing branches. Contact your local sales representative to discuss requirements.

Assembled-to-Order
These products are assembled to order upon receipt of a customer order. All components required to build an ATO item cannot be sold separately and must form part of a kit. Standard lead time is 4-6 weeks from date of order.

Made to Order
These products are manufactured according to a customer's specification. They are marked in our catalogues as "▲ Available on request" and have a standard lead time of 2-3 weeks.

Engineered-to-Order
These products are a custom designed product that is 100% fit-for-purpose, delivered on-site and ready for installation. Our design & engineering team can customise an enclosure to suit the application requirements. Contact us for more information.

Customisable Project Services

Collaboration

- Convert customer requirements to product build specifications
- Work to customer delivery schedule
- Initiate procurement or consignment of stock allocations
- Supply of equipment configuration

Complete Project Management

- One point of contact
- Responsive communication channels
- DIFOTIS - Delivered In Full On Time In Specification
- Accountability for the delivery of our commitment to customers

Electrical & Equipment Integration

- Wiring and equipment installed to exact requirements
- Management of free issue, consigned and/or B&R sourced components and equipment
- Stock reporting and job allocation
Testing & Reporting To Customer Specifications

- Digital reports of product testing and acceptance
- Serialised codes to customer requirements, digital signature, component traceability and unique identifiers
- Real time quality assurance authorisation, approval and confirmation

Customer Specific Logistics

- Storage and warehouse management
- Site delivery logistics
- Option for removal of product packaging after installation

The B&R Engagement Loop
(Project Services)

In order to engage successfully with our project customer's, B&R representatives follow a structured service plan.

We take our responsibility seriously, and pride ourselves on the collaborative and open relationships we undertake with our project customers. This makes sure we understand and provide value, because our customer's needs vary greatly across the different types of project applications and technical requirements.

1. Our first action before we reach out or after a customer had reached out to us, is to **INVESTIGATE**. This includes researching the customer/ project and any other relevant stakeholders.

2. The second action of **UNDERSTAND** is when we speak to the customer at length about their issue and challenges for current and future projects. From these discussions we can begin to see how our product solutions can solve the customer's issues and challenges.

3. We take our newly acquired customer knowledge back to our in-house design, engineering and estimating teams for our third action to **SCOPE** the work, and prepare quotes and drawings as required.

4. Once we have created the tailored offer for the customer we process any variations which might be needed before our fourth action of **AGREE**. With everything signed off we move into manufacturing and equipment integration.

5. Once the product solution is ready our fifth action of **DELIVER** takes place. We make sure the goods are shipped to site according to agreed upon timelines.

6. To learn from our experience and confirm our service level we take an **EVALUATION** action. This is when we reflect on the job we've completed and depending on the size and extent of the order we will seek customer feedback as well.

Our Customers

Accreditations & Compliance

At B&R, quality and value are just the beginning. We strive to deliver quality products developed and manufactured by a team dedicated to excellence, backed by standards, approvals and industry accreditations.

ISO 9001:2015

Every B&R Enclosures manufacturing facility is externally audited to ensure that the quality of our products meet the stringent ISO9001 standards. B&R's products are carefully inspected at the end of lines during the manufacturing process to ensure that the enclosures will withstand their intended environment and application.

ISO 14001:2015

Sets out the criteria for an environmental management system. It maps out a framework that a company or organisation can follow to set up an effective environmental management system.

ISO 45001:2018

An externally audited Occupational Health and Safety Management System.

RoHS

The RoHS directive aims to restrict certain dangerous substances commonly used in electronic and electronic equipment.

ASSDA

The Australian Stainless Steel Development Association provides comprehensive technical information on stainless steel. This includes information for users, equipment manufacturers and stainless steel suppliers.

Home Networking

A range of enclosures to provide a solution for Fibre-To-The-Home (FTTH) connectivity, suitable for fibre and copper cables.

The home networking enclosures can be either surface or flush mounted and meets the requirements outlined in NBN's Residential Preparation and Installation Guidelines.

Options include basic to fully feature and are aesthetically designed to fit into any home whilst eliminating unsightly cabling to the enclosure.

Features Include:

■ Suitable for mounting internally.
■ 4mm diameter bursts for easy mounting of DIN rail.
■ Industry standard hole pattern for flexible third party equipment installation.
■ Space for additional port patch units.
■ Hinged mounting pan allows easy access behind mount pan to route fibre to NTD enclosure.
■ Supplied with double GPO compliant with AS/NZS3000 (on fully featured model only).
■ Cable entries provide pre-punched knockouts for easy cable access.
■ Mounting position for NBN battery backup power supply.
■ Mounting position with screws for standard NBN NTD enclosure.
■ Supplied with one 8-port patch unit (on selected models only).
■ Available with window front door or full steel door option.
■ Optional flush kit available.

Mounting positions and holes for PSU and NTD. Included as standard with screws, for a standard NBN NTD enclosure.

Hinged mounting pan allows easy access behind mounting pan to route fibre to NTD enclosure.

Supplied with double GPO – Specific models are supplied with double GPO compliant with AS/NZS3000.
Industry standard 6" hole pattern for flexible third party equipment.

Supplied with one 8-port patch units – No additional costs for small patching requirements. (On selected models only).

4mm diameter bursts for easy mounting of DIN rail.

Cable entries provide pre-punched knockouts for easy cable access.

Power Supply Unit (not included) – Mounting position for NBN battery backup power supply.

Home Networking
External use cabinet

- Suitable for most home networking applications.
- A solution for Fibre-To-The-Home (FTTH) connectivity.
- Can be mounted directly under any 485mm wide Horizon series enclosure.
- Metal mounting pan.
- OptiComm approved.
- Manufactured from 1.0mm zinc coated steel.
- Powdercoated Light Grey RAL7035.

RAL9016

- Suitable for Fibre-To-The-Home (FTTH) connectivity.
- Designed to suit both fibre and copper lines.
- Can be surface or flush mounted.
- Available as fully featured or basic option.
- Easy mounting of DIN rail.
- Space for additional port patch panels.
- Industry standard 6 inch hole pattern.
- Mounting position for NBN battery back up power supply.
- Acrylic front door for Wi-Fi signal.
- Patch panel (CAT6) and double GPO in fully featured product.
- Manufactured from 1.0mm thick zinc coated steel.
- Powdercoated Traffic White RAL9016.

Horizon Series Metering Enclosures

At B&R, safety is our goal and the Horizon series is packed with features that you will never want anything else. Fast. Safe. Australian.

B&R's Horizon Series is designed and manufactured in Australia, and specifically suited to the unique local environments within Australia.

The unique features of this product series provide increased safety, quality and performance, while being suitable for both residential and light commercial applications and single and multi-phase installations.

The Series complies with all Australian Supply Authority Service and Installation Rules (SIR) integrating AS/NZS 3000, AS/NZS 3012 and AS/NZS 61439 for construction and demolition sites.

Horizon Series Metering Enclosures

Panel retainer is a captive ¼ turn panel retainer (stays with the panel) preventing nuts from falling off and being lost.

Insulated escutcheons are moulded plastic with ¼ turn screws to prevent any possibility of accidental shorting or shock.

RotaDIN® rotatable and removable DIN rail allows greater visibility to termination switchgear, enabling safe termination of cables and better inspection capabilities.

Cable entry with a ratchet sliding mechanism to close off the aperture in compliance with AS/NZS 3000.

Gravity catch is designed to create a positive closing position and the handle remains flush with the door, eliminating any snag points.
Bevelled door and double fold edges resists twisting and makes for safer handling. The safety door edge will not cut hands or cables.

Covered labelling section provides a consistent position for clear circuit identification labels. The protective clear cover prevents any labels peeling or falling off.
Safety cord retainer is a unique feature of the Horizon enclosures designed for easy retention of extension cords to AS/NZS 3012.

Horizon Q Series

Residential metering enclosures for QLD applications

- Designed for both single and multi-phase installations.
- AS/NZS 3012 compliant for construction sites as standard.
- Region D wind rated to AS1170.2-2002: Structural design actions – Wind actions.
- Provide safety, quality and performance.
- Suitable for domestic and light commercial metering applications.
- Self-closing gravity catch.
- Top cable entry has ratchet aperture shut-off slide.
- RotaDIN rotating / removable DIN section.
- Cord retainer for easy retention of extension cords.
- Circuit identification label area with protective cover.
- Weatherproof installation label for AS/NZS3000 compliance.
- External frame mounting brackets.
- Manufactured from 1.0mm thick galvanised steel or 316 stainless steel.
- Powdercoated Light Grey RAL7035 or N4 surface finish.

Victoria CT Series
Residential metering enclosures & frames for VIC applications

RAL7035 | Stl | IP23 | VSIR Approval #SIR140615B

• Suitable for installations that require the use of CT metering above 100A.

Enclosures
• Manufactured from 1.0 / 1.2mm thick galvanised steel to Z275.
• Powdercoated Light Grey RAL7035.

Frames
• Manufactured from 1.2 / 1.6mm thick galvanised steel to Z275.
• Powdercoated Light Grey RAL7035.

Victoria Brackets & Accessories
Accessories for VIC metering enclosures

- Suitable for use on all VIC domestic and commercial overhead mains installations.
- Used as a point of attachment for above ground service mains to the premises.
- Designed and tested to VIC supply authority rules & regulations.
- VSIR approval number #VSIR990705R
- 1.0kN single phase or 2.0kN multi-phase strength rating
- Tested to meet SIR requirements.
- Manufactured from hot dipped galvanised steel to AS/NZS 4680.

Horizon S Series
Residential metering enclosures for SA applications

- Designed for both single and multi-phase installations.
- AS/NZS 3012 compliant for construction sites as standard.
- Region D wind rated to AS1170.2-2002: Structural design actions – Wind actions.
- Provides safety, quality and performance.
- Suitable for domestic and light commercial metering applications.
- Self-closing gravity catch.
- Top cable entry has ratchet aperture shut-off slide.
- RotaDIN rotating / removable DIN section.
- Cord retainer for easy retention of extension cords.
- Circuit identification label area with protective cover.
- Weatherproof installation label for AS/NZS3000 compliance.
- Padlockable facility.
- External frame mounting brackets
- To suit type 1 and type 2 meter panel.
- Manufactured from 1.0 galvanised steel or 316 stainless steel.
- Powdercoated Light Grey RAL7035 or N4 surface finish.

Installation accessories for metering enclosures

- Suitable for domestic and commercial metering applications.
- Designed to comply with AS 5112.
- Exceeds AS/NZS 61439 requirements for glow wire testing.
- Generous tunnel sizing for large cables.
- Sealable.
- Various colour covers to identify active conductors.
- Robust polycarb plastic

Pre-Wired Group Metering

The pre-wired group metering enclosures (GMEs) from B&R, provide an easy, off-the-shelf solution for multiple tenancy sites.

These GMEs can be installed free standing using the appropriate plinth and comply with the latest regulations to ensure a trouble-free installation.

Meter and service fuses – 100A meter and 100A service fuses come supplied, installed and wired within the enclosure.
We will wire it all for you! Pre-wired for single phase metering, ready to install.

Tenancy MCBs come installed and wired in the enclosure.

Supply capacity control – segregated area for provision of supply capacity control
if required.

Extra space – additional DIN space is provided across the entire range to cater for individual needs.

Please Note: These features relate to the Victorian pre-wired group metering enclosure.

Victoria Group Metering
Enclosures to suit VIC applications

RAL7035 · StI · IP23 · (Australia) · ✔ Victoria Supply Authority

- Designed for single phase installations.
- Solutions for multiple tenancy installations throughout Victoria.
- Pre-wired, ready to fit meter.
- Ample DIN space.
- Upgradeable to include supply capacity control
- Manufactured from 1.0mm thick galvanised steel to Z275.
- Powdercoated Light Grey RAL7035.

Comes standard with:
- 40A tenancy sub-main MCBs
- Meter fuse holders
- Service protection device fuse holders

GMPV05

South Australia Group Metering
Enclosures to suit SA applications

- Designed for both single and multi-phase installations.
- Pre-wired solutions for up to 125A 3Ph supply (main switch not included)
- Pre-wired and ready to fit meter.
- Ample DIN space.
- Manufactured from 1.0mm thick galvanised steel to Z275.
- Powdercoated Light Grey RAL7035.

Comes standard with:
- Tenancy sub-main MCBs
- Metal loadcentre integrated with lock-off devices for meter isolation and service protection.

Infinity 3G
## Modular & pre-configured switchboards

B&R's Infinity 3G range is a smart, national approach to metering providing a modular or pre-configured solution for power distribution and metering applications up to 630Amps.

FEATURES

- Complies with all Australian Switchboard Standards.

- Meets and exceeds all National Authority Regulations for power distribution and metering applications up to 630Amps.

- Simple design to reduce errors and call backs.

- Easily assembled saving time and labour.

- Tested to IEC 61439 and AS/NZS 3439 and compliant with AS/NZS 61439 — the Australian standard for switchboards.

- Enclosures to suit all environmental conditions and are available in IP66, IP34 and IP2x.

- Metric Matrix modular grid system makes switchboard design quick and compact.

- One fixing screw fits all modules reducing assembly time.

- Hinged escutcheons improve safety during maintenance.

- Escutcheons and panels are interchangeable and allow for either left or right hinging.

- Special door hinging allows door to be left or right hinged.

- Loose supply, pre-assembled or pre-wired options to suit your time and budget.

- Manufactured from zinc coated steel, 316 stainless steel and aluminium.

For more information on the Infinity 3G range please refer to separate catalogue or visit **brenclosures.com.au/infinity-3G/**

Infinity 3G
Modular & pre-configured switchboards

COMPLIANCE

Do you require a solution that complies with all National Supply Authority Regulations?

AS/NZS 61439

DESIGN

Specialist engineers work closely with customers to deliver custom solutions or standard off the shelf alternatives.

MODULAR

A simple design that can be easily assembled— one screw fits all modules.
