

BLU-BIT Series

An air-water heat exchanger designed for demanding environments.

- Suitable for high dust, high temperature environments where chilled water is available (chillers are NOT sold by B&R Enclosures).
- Cooling capacities from 1kW to 15kW.
- Extremely low maintenance.
- High IP55 protection rating maintains seal between heat exchanger and enclosure.
- Electromechanical thermostat, solenoid valve or level switch is NOT included (sold separately).
- All fixings required for assembly are provided.
- Manufactured from mild steel.
- Powdercoated Pebble Grey RAL7032 (other colours available on request).
