

Cold Aisle

Increase your cooling efficiency with cold aisle containment.

- Designed to increase cooling capacity whilst keeping power consumption low.
- Suitable for use in any size data room where equipment needs to be cooled.
- Avoids hot air short circuit.
- Reduces volume of air needing to be cooled.
- Improves efficiency of the cooling system.
- Energy cost savings.
- Prevents air temperature zones mixing together in a data centre.
- Manufactured from zinc coated steel.
- Powdercoated textured matt black.
