

Connector TE

A range of enclosures suitable for many applications where a smaller enclosure is required.

- Used in applications including housing of terminations, pushbuttons or switchgear in harsh environments.
- Mounting electrical equipment can be done via a mounting or DIN rail for easy installation.
- Flat face gutter ensures a reliable and long-lasting seal no matter what the application.
- Captive 316 stainless steel combo head screws used to prevent loss when fastening.
- Also available with mounting flanges.
- Manufactured from
 - 1.2mm zinc coated steel
 - 1.2mm / 1.5mm 316 stainless steel
