

Breadth

.....designed for harsh conditions

Finucane FI

A mining and industrial enclosure designed for a variety of applications.

- Suitable for local control stations, mini control consoles and motor isolators in conveyor runs.
- Specifically designed to meet the demand of the harsh Australian conditions in mining and industrial applications.
- 15° forward sloping roof to prevent the build up of water and solids.
- Internal enclosure and sunshade enclosure.
- Extended roof and gutter system to inhibit water from entering the enclosure on opening.
- Removable doors with pintle hinges.
- Depth adjustable steel mounting pan included to provide flexibility for cable glands.
- Sunshade with 15° reverse angle sloping roof to prevent the build up of water and solids.
- Large opening in bottom for maximum cable access.
- Designed to protect enclosure from direct sunlight and reduce temperatures inside the enclosure.
- Manufactured from 1.5mm thick 316 stainless steel.
- Surface finish N4.
