

# Breadth

.....designed for protection and safety

## Pilbara SP

A heavy-duty enclosure developed and tested for harsh environments.

- Designed for use in local control stations, mini control consoles or motor isolation control stations.
- Designed in sizes suitable for the most common mining, mineral processing and infrastructure projects.
- 30° sloping roof to prevent build up of water and solids.
- Easy installation with top and bottom mounting flanges.
- Flexible equipment mounting options.
- Fully enclosed 3-point locking system on most sizes (excluding SP040425).
- LockSock® protective lock cover (IP55).
- Sunshade kits available
- Manufactured from  
2mm thick zinc coated steel  
1.5mm thick 316 stainless steel
