Assembled-to-order

A bayable enclosure system which is versatile and simple-to-install.

- Designed for a range of market applications including industrial automation and control, plant construction, data and networking infrastructure and telecommunications.
- Assembled-to-order provides a fully customisable cabinet.
- Rated IP55 when side panels are fitted.
- Unique symmetrical rail profile allows components to be interchangeable.
- High frequency welded and strengthened galvanised steel frame.
- Front and rear frames are mechanically fastened and secured for added strength.
- Depth rails can be disassembled to allow access through doorways.
- Front access M6 & M8 cage nuts in frame.
- Integrated ground fixing points (M8).
- Powdercoated Light Grey RAL 7035 as standard. Other colour options are available.
- Manufactured from  
1.5mm galvanised steel frame  
1.6 mm zinc coated steel cladding
