

# Hedland PH

A mining and industrial enclosure designed for a variety of applications.

- Suitable for local control stations, mini control consoles and motor isolators in conveyor runs.
- Designed to meet the harsh demands of the Australian environment.
- 15° sloping roof designed to prevent solids and water from building up on the surface.
- The sloped face creates an ergonomic interface when fitted with pushbuttons and control equipment.
- Easy installation with top and bottom mounting flanges.
- Full welded construction.
- Pintle hinges.
- Depth adjustable mounting pan.
- Manufactured from 1.5mm thick 316 stainless steel.
- Surface finish N4.
